

## The most comfortable 2-component BallGrip™ handle available

The screwdrivers in the Series 6000 BallGrip™ line provide outstanding comfort, grip and torque in a 2-component ergonomic handle design. The round ball shaped handle design provides the user superior torque. The cushion grip design of the handle provides a unique non-slip feature as well as finger tip control when turning smaller screws.

### One glance tip identification

Easily identify the tip of the screwdriver simply by looking at the base of the handle. This system allows you to store screwdrivers like you normally would in your tool bag or belt and select the right tool for your fastener without having to look at each tip.

### Anti-roll design

Blades manufactured from special chrome-vanadium-molybdenum steel results in superior blade hardness and torque values which far exceed DIN and ISO standards.

**Bondhus Lifetime Warranty**

# BallGrip™ Screwdrivers

**AVAILABLE ONLY IN USA**

**Item # 16758 88122 - Two Pack BallGrip™ Screwdriver Set**

List Price \$23.52
